Deploy in minutes

Predefined dashboards

Reduce mean time to respond

Cyber Asset Visibility & Risk Management

Automated Actions & Notifications

95% of enterprises discover they only have security controls for 85% of their asset ecosystem.

This introduces critical security gaps and elevated risk of a data breach because you can't protect what you don't know you have.

Key Benefits

Get a Credible, Comprehensive Inventory

Aggregate data from all sources that know about assets to gain a comprehensive and accurate asset inventory of all devices, users, cloud assets, software applications.

Identify Gaps And Risk In Security Coverage

Understand when assets are missing critical security controls, when they have unsanctioned or vulnerable software, when misconfigurations create security gaps, or when known vulnerabilities exist in your

Validate And Enforce Policies

Automatically validate policies and decide which custom actions to trigger any time an asset doesn't adhere to your policy or expectations.

Use Cases

Asset Discovery

Unmanaged vs. Managed Devices
Ephemeral Devices (containers, VMs)

Cloud Management

Multi-cloud inventory and tracking

User Inventory

User account tracking and management
User to device(s) association

Policy Management

User password policy enforcement
User privilege monitoring

Endpoint Management

Agents coverage and health
Non Functioning Agents

Security Operations

Contextualized alert triage and incident response
Vulnerability assessment coverage and CVE prioritization

Software Management

3rd party software tracing
Unsanctioned and EOL software

Automated Actions

Isolate related machines
Notify teams (email, teams, slack, ticketing services)
when assets don't meet policies

How It Works

1 Choose Your Deployment Option

Deploy OctoXLabs as a customer- hosted (on-premise/ cloud) solution.

2 Connect Adapters

Connect to the different solutions you already use with Adapters – predefined integrations on the OctoXLabs platform.

3 Examine Your Assets And Take Action

OctoXLabs provides a fully unique list of devices, users, software, cloud assets in your environment, so you can discover and detect risk and created actionable alert when policies aren't met.

About us

OctoXLabs provide complete visibility across the entire IT infrastructure, giving organisations better governance & control over their cyber assets. Combine cyber asset data from all of your security tools into a single, unified view and strengthen the foundation of your security program with OctoXLabs.
